

Click on **Play Store**

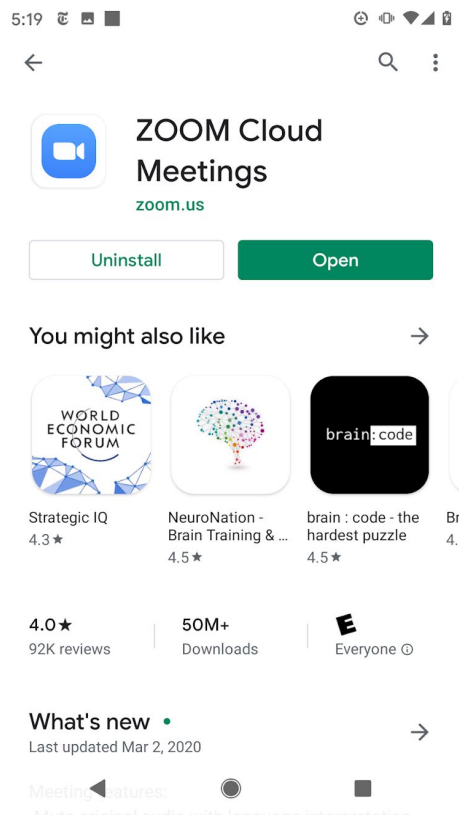

Go to the **Search Bar**

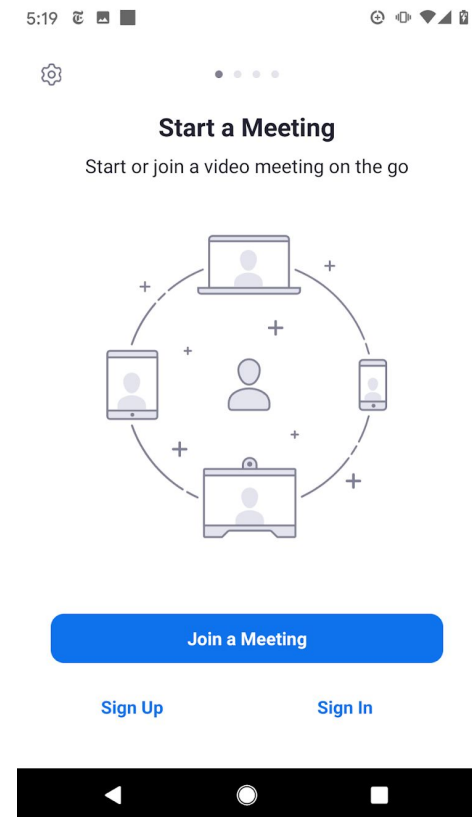

Search for "Zoom." Click on "Zoom Cloud Meetings."

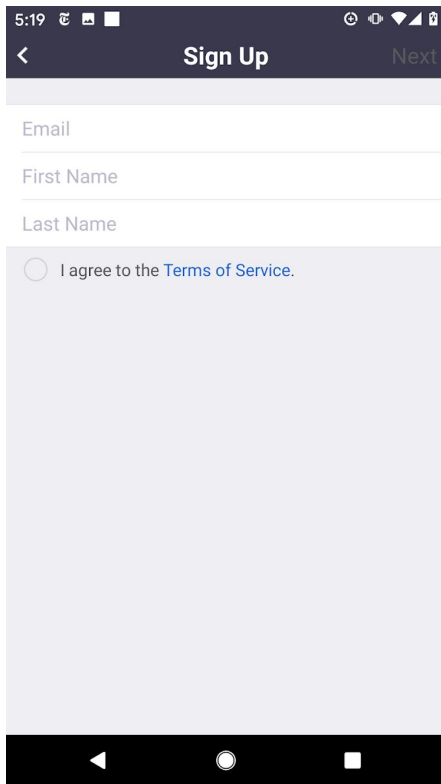

Click on the **Install** button.

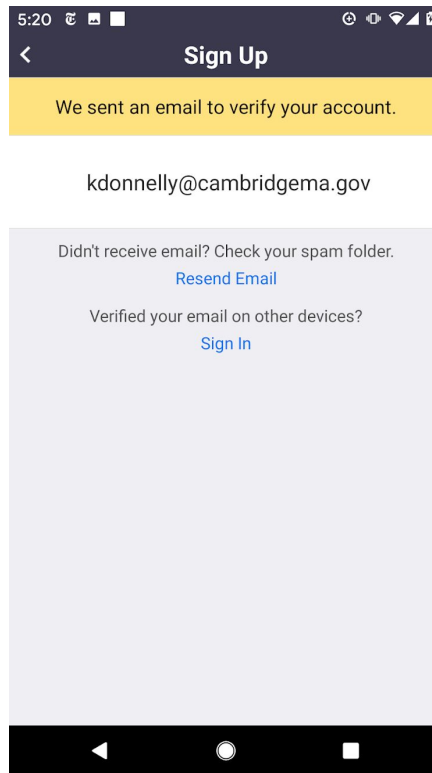

After the app installs, click on the **Open** button.

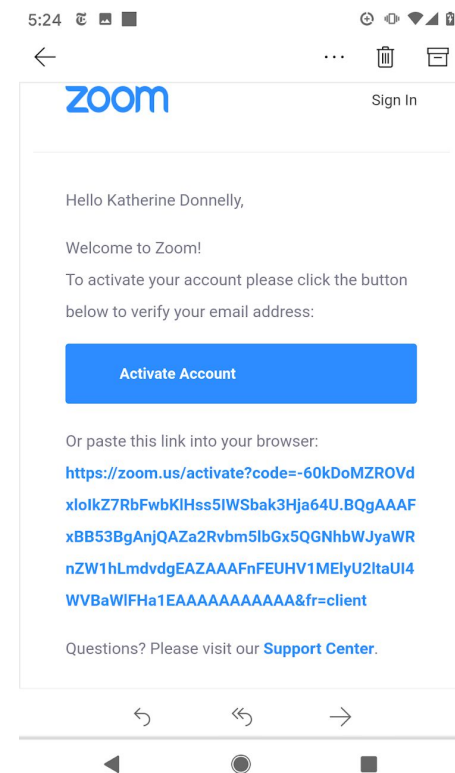

Now you are in the app. Click on the **Sign Up** button.

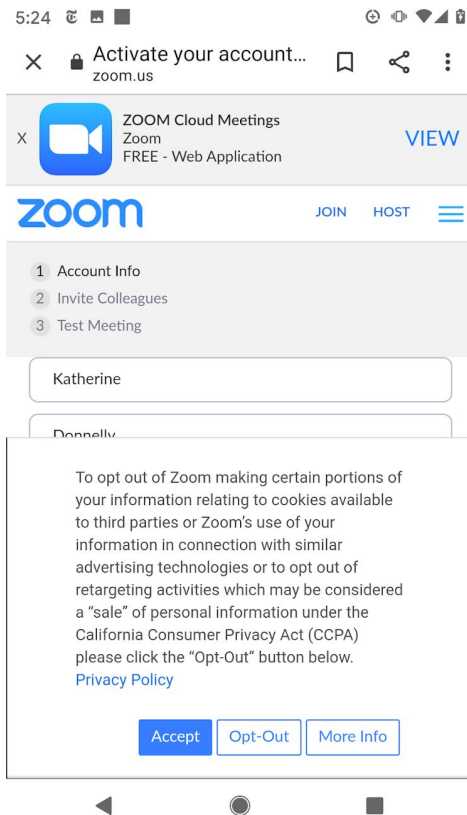

Enter your **email** and your **first and last name**. Then click the “I agree” button.

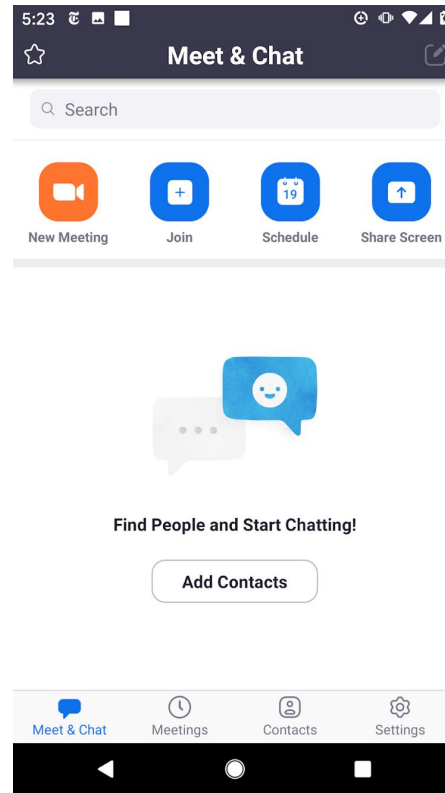

You will see a notification to check your email.

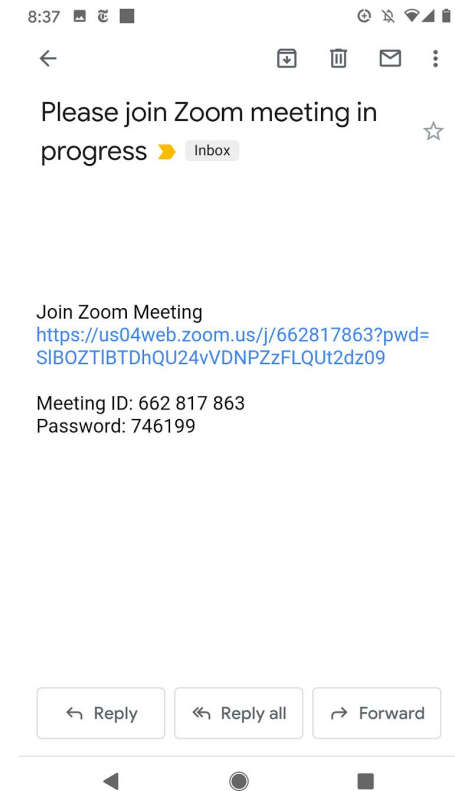

In your email, click on the **Activate Account** button.

You will be asked to enter your name, and to create a password. You do not need to do the next two steps (you don't need to "invite colleagues" or "test a meeting.")

Go back to the Zoom app from your homescreen. Your teacher may ask you to "join" a meeting using this button.

Your teacher might send you an email to join a meeting. You can click on the link and it will bring you to the Zoom app.
