PEW RESEARCH CENTER

"Publishers of books in all formats made almost $26 billion in revenue last year in the U.S., with print making up $22.6 billion and e-books taking $2.04 billion.

While millennials are sometimes blamed for killing industries, it's actually younger people who appear to be popularizing print. Sixty-three percent of physical book sales in the U.K. are to people under the age of 44, while 52% of e-book sales are to those over 45, according to Nielsen.

It's a similar picture in the U.S., where 75% of people aged 18 to 29 claimed to have read a physical book in 2017, higher than the average of 67%, according to Pew Research."
